

It's STEM week in Reception!

9th -12th November

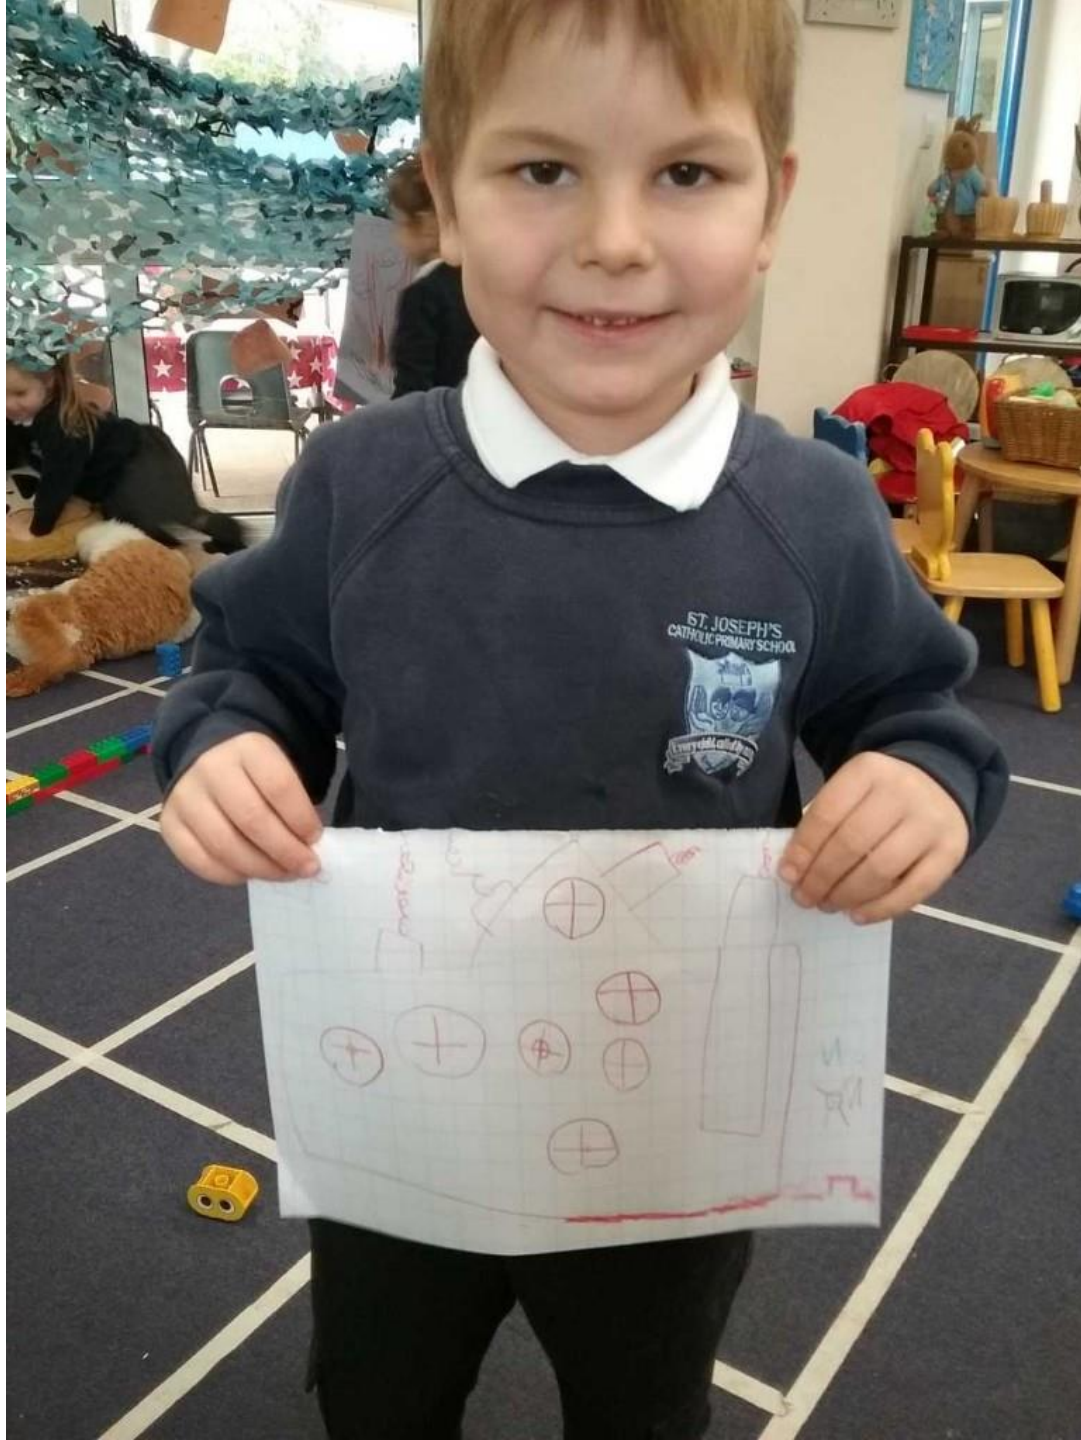

We began
with a
familiar
story.....

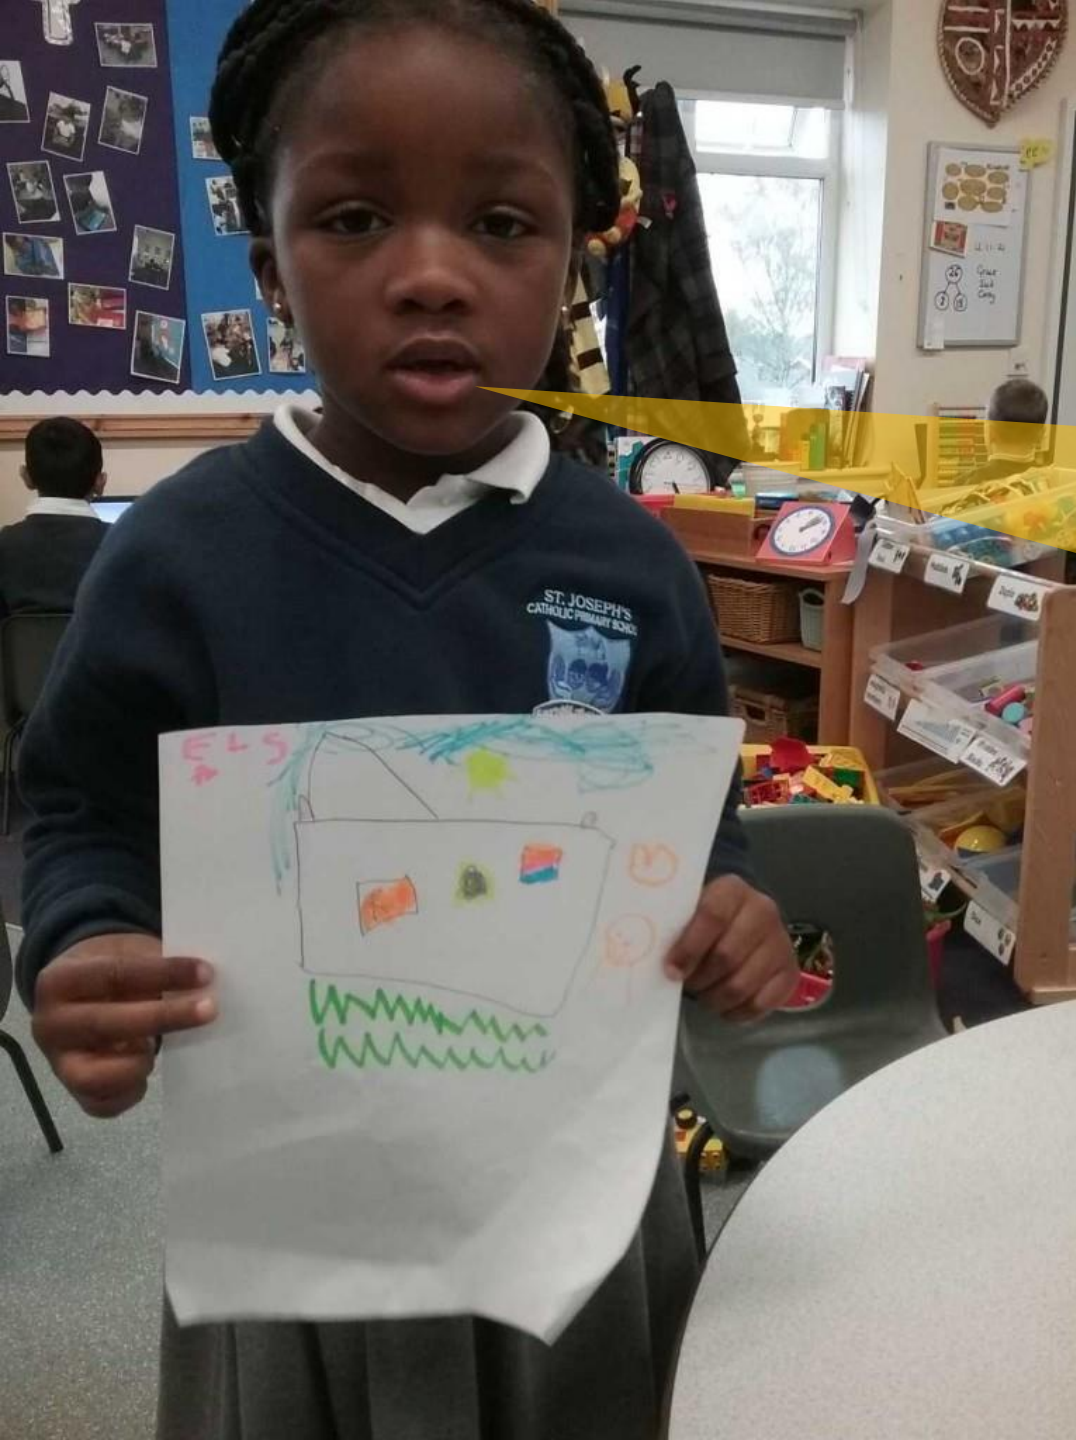

Can you make some houses made of
straw, sticks and bricks?

How can we test
how strong they
are?

Let's start
with a plan!

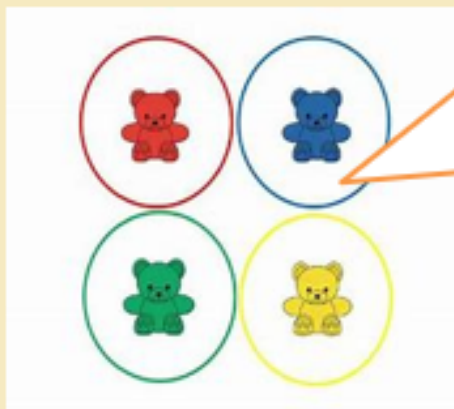

This is the brick house. It was the best because the wolf couldn't blow it down.

Now let's get to work!

Keeping Teddy dry.....

Help! The pigs might be all warm and cosy now, but they've left us out in the rain. Can you make some shelters to keep us dry?

MR. PERFECT

Mr Perfect loves when everything is clean and tidy. He does not like when things are in a mess

He even wants to clean all his money! Can you help him?

Can we match the seeds to the fruits?

Frozen adventure

Can you
rescue the
frozen
creatures?

We could pour
water over the ice.

We could pour warm
water over the ice!

Chocolate
button
challenge!

How long will it take to melt?

Question!

Can we
make
melted
chocolate
solid again?

We are
learning to log
on to our
laptops and
access
different
programmes.

We have been looking for shapes in the environment.

We have sorted
circles and triangles.

for letting us share STEM Week with you!

We have been
having fun with
bubbles!
